Drawing was "Photoshopped" into Photoshop The key to image editing, whether it's creating a design or manipulating an existing design, is taking the original layout or vector line art and transforming that into a fine art piece. The key is identifying where each line is and then eliminating the lines that create unwanted elements or jarring elements. Photoshop is a very large program and almost makes any day job a hobby. However, it has its own way of doing things. In this article, we're going to go over Photoshop's built-in line art removal tools, and remove unwanted lines of drawing. Removing Lines From Image You can remove unwanted lines from any image by using the line cutting tool available in Photoshop. This tool is available by going to the Line tool's icon in the Tools panel. The line cutting tool is a polygon tool with many different edges that can be selected. You can move the tool around and drag it in multiple directions. If you are using a graphics tablet, you will use the pen to manipulate the line tool. Selecting the line cutting tool You can use the vertical and horizontal line in the tool's options menu to easily select the line tool. You can also alter the line's length with the slider tool. In this figure, we are going to remove the green lines in the inset. You can see in the original image that the green line is preventing the rest of the design from going together. Removing the lines with the line tool Because we're using the polygon tool, we don't need to alter any existing lines so it's simple to trace the line and delete it. Our new design is much easier to read. The edge elements are smooth and more desirable. We have done a lot of work to eliminate lines that interfere with the design. Adjusting the Line Art Design When you want to improve the readability and appearance of your design or figure, you should look for the line art that breaks the design and then modify the art so that it is smooth and clean. This can be done by using the pen tool. Selecting the pen tool We will use the pen tool to place the line art that we want to improve or change. You can click and drag the pen around the image to draw and alter line art. When you are done with your drawing, click the pen tool

Black Stump says TNA should be on TV Don Kaye Friday, August 26, 2009 From the March issue of TNA Impact!: "I know that TNA wouldn't be on TV if it wasn't for WCW, for sure. WCW gave us a chance and gave us a business to build on, and we did it." What he did not say is that TNA used WCW to build its business in the first place and that TNA's growth is in large part due to WCW's own demise, thanks to legal wrangling between the companies.
