In this sentence from The Agrarian Question, A.O.H. Smith says "The conservative revolution of the Goulburn district, to hold the view that the police doles are a great social evil, was not stimulated by a knowledge of the details of the allegations, but by a widespread sense of grievance about their own position". I guess to hold the view that is not a locution one can use as a noun or verb. Please help me understand its meaning and usage in context. A: [NOTE: The answer has been slightly changed in response to the change in the OP's question. Thanks to the OP for pointing out that my answer was inadequate. Also, for completeness, I have added a supplementary footnote to my answer.] "Hold" here means "believe". An example of usage of this phrase in the New Oxford American Dictionary is: He still holds a grudge against the man. I have found several entries in Cambridge Advanced Learner's Dictionary that refer to the same sense of the word "hold". In your case, the phrase means "to believe that the police doles are a great social evil". Q: Updating a relation in MYSQL within while loop I have a MySQL table products (id, product_name, product_code) products_categories (product_id, category_id) categories (id, category_name) Now, my application uses the products table to display the product list. To simplify things, I also have the categories column in the products table products_categories is a junction table with both products_id, category_id columns. What I am trying to do is update the product.category_id whenever a product is saved. The idea is to just add an id for the categories, but I am having problems doing that. Here's my code $sql = "SELECT * FROM products WHERE product_name LIKE '%". $search. 6a5afdab4c

* Merge videos and photos * Create a new video from existing ones * Edit image and video * Burn images and videos into a single video file * Load image and video from file * Edit and trim videos Hey guys, this is new free android video editing app to create your own movies and TV shows, this application has different clips that you can get from youtube and from mobile phone.This app provides not only editing a particular part of an image but also provides you complete editing of your image and video. The user can manage the recorded videos.It's simple in use. Download the app and enjoy it. Hii guys, today i bring an cool app for android

Its size is moderate and it consumes some amount of RAM when in use. Its interface is straightforward and easy-to-understand It does not work, sometimes. Older version Newer version More information Video Mixing Size and Memory Usage Video Mixing is a free and very compact application. After unzipping the archive, you will get a file size of about 7MB. Video Mixing has an executable file, which is simply downloaded to your computer and starts working without the need to install anything else. This method is good for stealthy use of the program, since the operating system is not aware of its presence. Video Mixing RAM usage is negligible, as in most cases, it will not be invoked unless you start an operation that requires it. However, if you use a program that consumes significant amounts of RAM, Video Mixing will not be able to work without raising concerns of System RAS, which would likely slow down the whole machine. Resource Monitor will reveal you that the Video Mixing executable will consume up to 1 MB of RAM. Video Mixing Performance Video Mixing is able to perform efficiently. It is loaded into RAM and started with no other user intervention, because the developer programmed it in a way that it doesn't require any installation. Video Mixing has no issues with speed and because of its relatively small size, even an 8-core machine will not encounter any significant issues when the program starts working. It is scalable in terms of speed, but you need to remember that although it uses

some RAM, the amount is negligible. Video Mixing Features Video Mixing is not a tool for the advanced user. All its features are self-explanatory and very user-friendly. You are able to join two different videos, as well as the soundtracks. It has a small-sized interface. Video Mixing Statistics Video Mixing has no page file. Its task manager is small and consumes limited resources. Program and File Management Video Mixing can be added to the system startup programs. The program requires no installation. The program is small. Video Mixing Specific Requirements We would like to share some general information with you in order to make a better use of the application. Program or File System Requirements In order to run the Video

System Requirements:

Minimum: OS: Windows 7 SP1/8 (32-bit or 64-bit) CPU: Intel Pentium II (200 MHz) or faster, AMD Athlon (200 MHz) or faster, or Core i3-3220 or faster RAM: 2 GB Hard disk space: 30 GB Recommended: CPU: Intel Core i3-3225 or faster RAM: 4 GB Hard disk
