In battle, use skills, spells, and items to attack your enemies and avoid their attacks. There are three types of attack: A. Power Attacks B. Targeted Attacks C. Evasive Attacks Enemies are divided into three types: - Player Characters (PCs) and NPC's that work on behalf of the player. - Monsters that are entirely independent of the player. - Neutral monsters, which may or may not attack you depending on the situation. Power Attacks and Targeted Attacks are each used with a different action button. You can switch the action button corresponding with the desired attack type by pressing the 'B' button. When you raise an action, you can select from attacks with a variety of conditions to set the opponent's defense to zero. For example, you can instantly attack an enemy while they are sleeping to inflict maximum damage. You can also activate various abilities at certain points during battle to increase your effectiveness.
