What's new:

I have always liked to play Nintendo games, and they have always brought me an enormous sense of joy and satisfaction, and now that I play other games, I discovered that there are more ways to play games. Nintendo gets very innovative when it is focused on a project. I started playing Pokemon from the 3DS version, and since then I get the itch to play all the new games that Nintendo offers. Some games are really good for the touch screen, but I've always been a fan of the old Nintendo gameplay. Hi, this is Luc. I sometimes play other games as well. I like JRPGs for the stylus, and I like fighting games. Games that are not platformer on Wii U. In the RPG games on Wii U, I like the World of Final Fantasy games a lot. I like the Hyrule Warriors game. Recently I have played Devil's Third. The story was pretty cool and the game is fun to play despite the Japanese voice acting! (Luc) I am a hardcore gamer. I usually play Naruto, Kamiya San's, Ixion Saga, World of Final Fantasy, Street Fighter 3 and System Lords and I also play other games. It's hard to stop playing once I start. (Luc) I also found several games on Nintendo that I like. I enjoy the Pokemon games. I like the Nintendo 3DS. And I also play non-Nintendo games. My favorite games are Final Fantasy VII and Final Fantasy X. (Luc) As a child, I played the Nintendo games when I was younger. I was a big fan of the Legend of Zelda. I also like Star Fox 64. (Luc) I try to play a wide variety of other video games that are not platformers. However, I still play a lot of Mario games. They are enjoyable. I was a fan of Pokémon when I was a child. And I love playing Pokemon games even after becoming older. (Luc) I enjoy playing Mario Kart 7 or Wii U racing games. I also play Pokemon. I love Ganondorf in my favorite Mario games. I also like The Legend of Zelda. I play various new Nintendo games that I haven't played much up to now. (Luc) I am a huge fan of Mario, The Legend of Zelda, and Pokémon. I enjoy playing the Nintendo 3DS Mario and Metroid games. I'm also a big fan of Splatoon, which is a

Q: Magento: Insert button on each item in list in the cart I am building a simple shopping site using Magento, my cart page looks like this: Each product is separated by an image. What I want is when a user clicks 'Add to cart' on the left, the same image should appear on the right to serve as a button. Any pointers on how to do it? A: Instead of hacking core files, I would normally recommend 2 routes. Create an extension that adds the features the code you need in the admin side of Magento Add the image button to the product description page in your theme Q: change the enable property of a button in a form as the form is loaded I have a form which has two buttons

```
public Form1() {  
InitializeComponent(); button1.Enabled =  
false; button2.Enabled = false; } This is  
the method I use to load the form. As soon  
as the form is loaded, I change the  
functionality of button1 and button2. The  
issue is that this works for button1 but not  
for button2. I tried to do it at two places.  
One in the constructor of the form and  
another in the Form_Load event of the form.
```

```
public Form1() { InitializeComponent();  
button1.Enabled = false; button2.Enabled =  
false; } private void Form1_Load(object  
sender, EventArgs e) { button1.Enabled =  
true; } Any idea why this happens? Please  
help. A: In the constructor of your form,  
you set button1 and button2 to disabled. You  
should update button1.Enabled after you set  
it. Also, you don't have to set it to true  
or false, you can just leave it set to  
false, which means it's enabled by default.  
So remove the if/else in the constructor.  
public Form1() { InitializeComponent();  
button1.Enabled = false; } That way, the  
constructor is just: public Form1() {  
InitializeComponent(); } And in the  
Form_Load event you should
```
