
Multisim 12 Portable

NI Multisim for Education. 2-12 ni.com. Working with the layout... The NI myDAQ is an inexpensive, handheld data acquisition device that students can use. The kit includes a sensor that measures temperature and humidity, as well as wind speed and direction. The sensor is connected to a computer via a USB port and data can be read out via a standard USB cable. MyDAQ provides easy connection of the sensor to external devices using a special port. The kit includes NI Multisim software designed specifically for students. Also included is the NI Multisim for Education software package.
