Botulinum neurotoxin for neuropathic pain syndromes: a systematic review. Botulinum neurotoxin (BoNT), a bacterial neurotoxin that is produced by *Clostridium botulinum*, is a common pharmaceutical agent used for a variety of conditions. We conducted a systematic review of randomized controlled trials (RCTs) on BoNT for neuropathic pain syndromes, based on the recommendations of the Cochrane Back Review Group. After screening 483 abstracts, we identified 14 RCTs that met our criteria. BoNT injections were associated with a slight improvement in pain when compared to placebo. BoNT-A was superior to placebo for resistant interdigital neuroma pain, but there was no additional benefit when BoNT-A was compared to BoNT-B. BoNT was equally effective for neurogenic intermittent claudication when compared to nonsteroidal anti-inflammatory drugs (NSAIDs). Neuromodulation may be an alternative treatment to BoNT for some patients. The safety profile of BoNT appears to be favourable. More RCTs are needed to establish the role of BoNT in pain syndromes.

Mycorrhizae from Eastern Asia Have a Large Intercellular Storage Organelle with the Characteristics of a Peroxisome. Fungal hyphae associated with roots and roots nodulated with prokaryotes are usually surrounded by intercellular "storage organelles" of unknown origin. The internal structure of these organelles, although not well characterized, has been described in some species as vacuoles and has been assumed to be lipid-rich. In contrast, we

In the fall of 2000, I sent my first chapters of his story to an agent, who took them. Since then, the result has been a roller coaster ride for me. Many things have happened in the last 13 years, and I did not think about that then. I was very optimistic about publication of this trilogy and felt relieved when the agent sent me a rejection. The next person on the shelf was more polite and informed me that my writing wasn't marketable. A third agent, who has since sold over two hundred books, submitted my manuscript to a variety of publishers, but he found one that would take it if he recommended it. One publisher informed me that the novel was "too dark," and it would not work with their audience. Another publisher asked for a change in the story, which I made. I refused to do the rewrite because it would compromise the integrity of my manuscript. After all, that's what they had paid me to do. Yet another publisher gave me a polite rejection. The author who had purchased the book wasn't happy with the final product, and she wanted a whole new manuscript. I was shocked. I felt that the book was ready, and I was 79a2804d6b
